

Cost = Minimum Cost to cell + Best possible cost from cell to end

How: find successive matches on vertical text while traversing horizontal text from central diagonal, down to the right

- * RIGHT: 12-Cost bounding path
- + RIGHT: 13-Cost bounding path
- o RIGHT: 14-Cost bounding path
- x RIGHT: 15-Cost bounding path

LEFT: 10-Cost bounding path

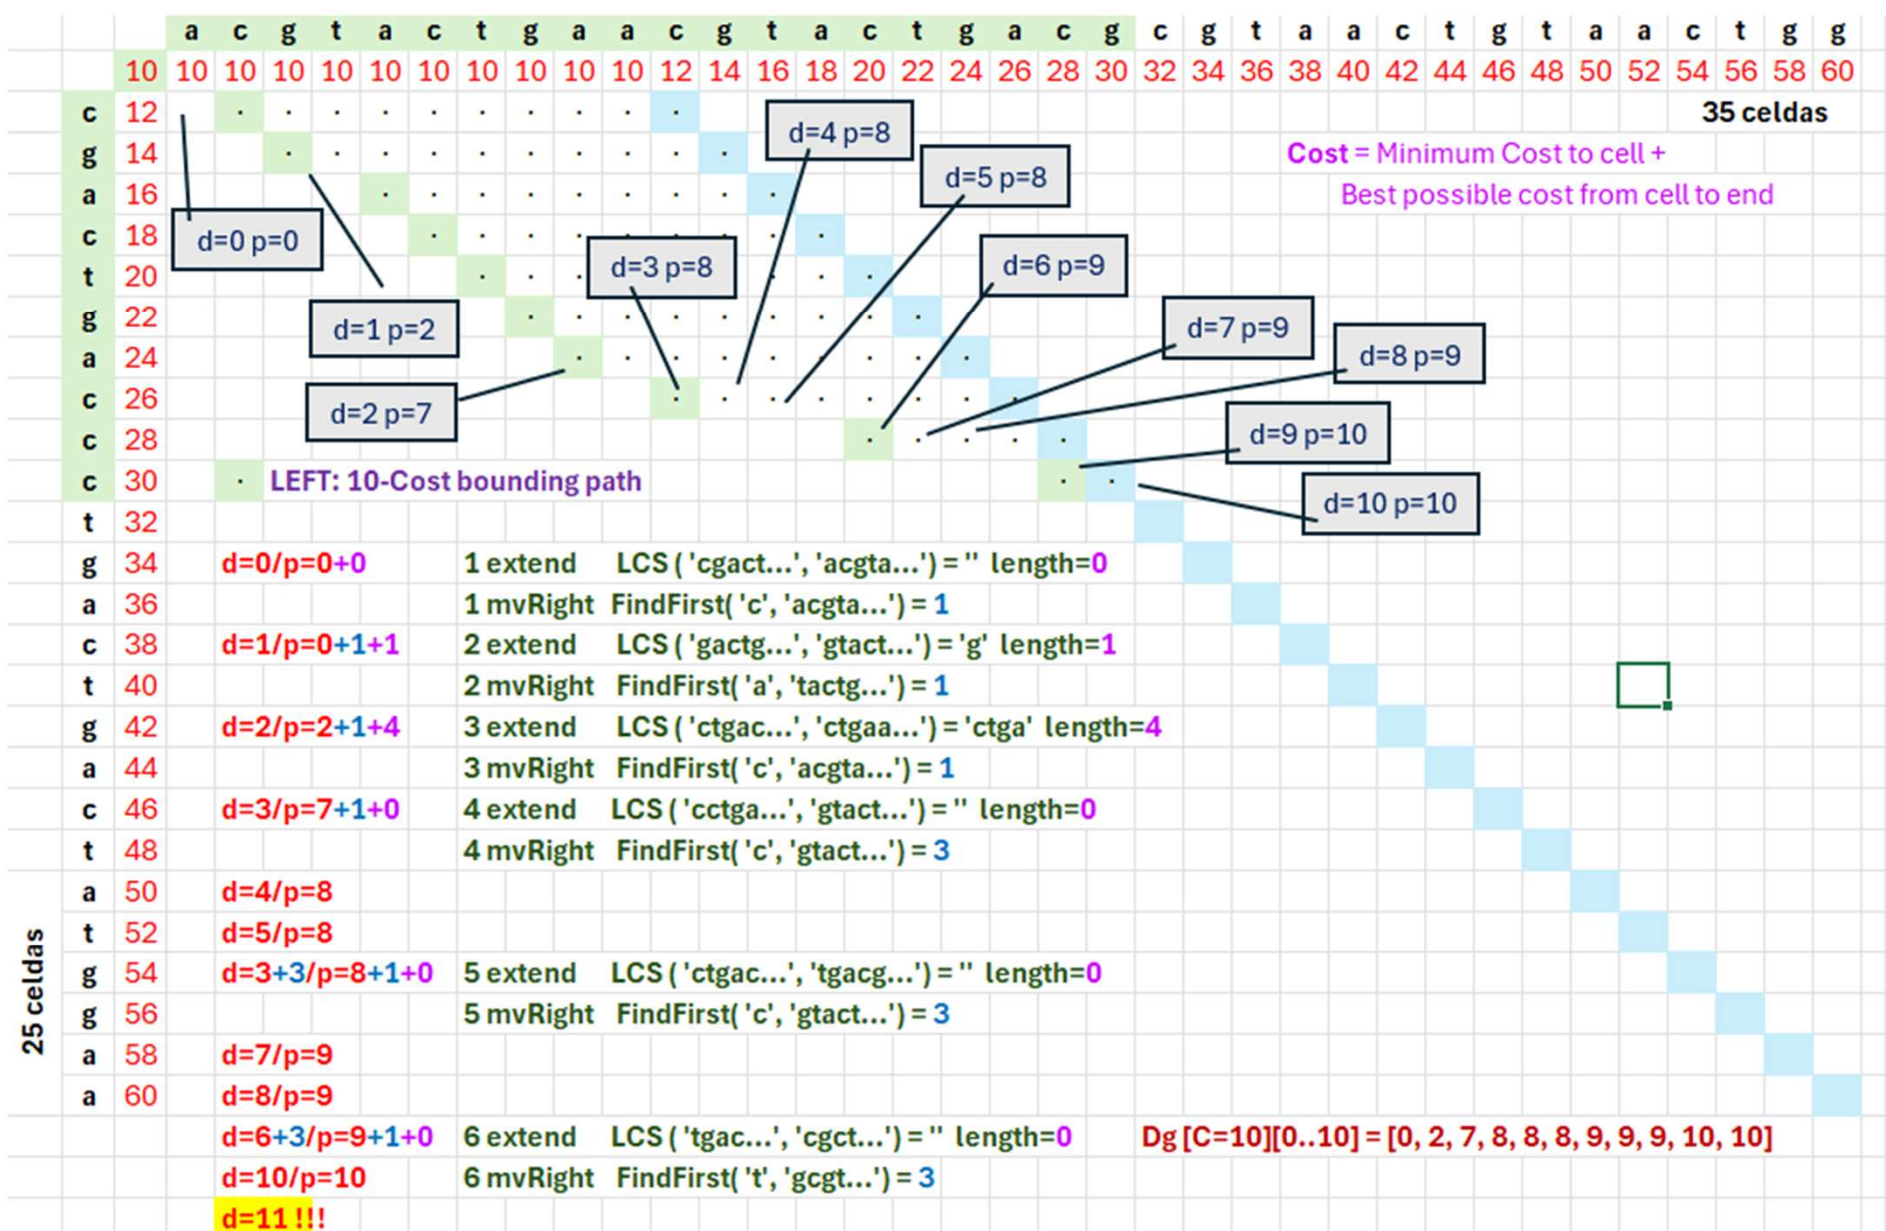

LEFT: 11-Cost bounding path

LEFT: 12-Cost bounding path

LEFT: 13-Cost bounding path

LEFT: 14-Cost bounding path

LEFT: 15-Cost bounding path

[illegible]
